

Infosys Training Program as CSR Initiative

Date: 23/09/24 - 05/10/24

The Advanced IT Skill Training program, organized in collaboration with Infosys, provided five selected students with an intensive 124-hour training focused on preparing them for careers as Test Engineers. The program included 100 hours dedicated to technical skills essential for testing processes, methodologies, and tools commonly used in the IT industry. In addition, 20 hours were allocated to soft skills training, which aimed to enhance communication, teamwork, and professional etiquette, crucial for a well-rounded approach to workplace readiness. This training initiative was designed to bridge the gap between academic knowledge and industry expectations, equipping students with both technical competencies and interpersonal skills to excel in their roles.
